Portfolio: https://portfolio-one-alpha-6gy1a73x99.vercel.app

SUMMARY

B.Tech AIML student at MLR Institute of Technology who turns practical campus problems into carefully designed software. Front-end focused (React, Tailwind CSS) with a working base in Python, Java, SQL and machine learning fundamentals. Seeking software engineering, full-stack or applied AI/ML internships.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML), MLRIT, Hyderabad (2022 - 2026, in progress)
* Coursework in Artificial Intelligence, Machine Learning and Data Structures
* Hands-on lab work in Python, Java and SQL database design
* Active in campus technical initiatives, workshops and buildathons

PROJECTS

Statio-MLR: Campus Digital Xerox & Stationery Ordering System (React, TypeScript, Tailwind CSS)
* Designed student workflow for document upload, print options (B&W/color, binding) and price calculation.
* Modeled live order status and scheduled collection slot picker to reduce photocopy queues.
* Defined counter-only QR pickup-verification flow for shop staff, kept separate from payment.
* Authored the software requirements specification (SRS) for the platform.

Fast Bite: Digital Campus Canteen Ordering System (React, TypeScript, Tailwind CSS)
* Designed mobile-first ordering interface with canteen menus, availability and customization.
* Prototyped scheduled pickup windows aligned with lecture/break timings with QR counter verification.
* Modeled live kitchen status (Order Placed, In Prep, Ready at Counter) and campus reward-points concept.

Personal Portfolio Website (React 19, TypeScript, Vite, Tailwind CSS v4, Motion; source on GitHub)
* Built responsive multi-page site with case-study routes, project simulators, and Cmd/Ctrl+K palette.
* Added accessibility basics: reduced-motion support, keyboard skip link and visible focus styles.

HACKATHONS

* Participant, Cloud technology hackathon
* Participant, Finathon

TECHNICAL SKILLS

* AI / ML: machine learning fundamentals, data preprocessing, model evaluation
* Languages: Python, Java
* Web Development: React, Tailwind CSS, HTML5/CSS3, responsive design
* DBMS: database management systems, SQL and schema design, database fundamentals, REST APIs, Supabase
* Prompting: prompt design and iteration
* Tools: Git and GitHub, VS Code, Vite, Linux and shell basics
* Core CS: data structures and algorithms, object-oriented design
